PRODUCT INFORMATION SHEET

FLOOR STRIPPER

Product SDS

FLOOR POLISH STRIPPER

Effective floor stripping agent suitable for removing water-based floor polish finishes.

DIRECTIONS

Use at a ratio of 1:5-1:2 (20-50% soln, 200ml to 500ml per ltr) with hot potable water. Use a mop to apply solution liberally to polished floor. Allow solution to soak for 5-10 minutes. Ensuring slurry is kept wet, reapply solution as required. If cold water is used, or for areas with a heavy build-up of polish allow longer soak periods. Scrub floor using a scrubbing machine and a heavy duty scrubbing pad. Thoroughly pick up solution using a clean mop or wet and dry vacuum cleaner. Ensure solution is completely removed. Use a clean damp mop and fresh water to remove any residue. Allow floor to dry completely and test neutral, before re-polishing.

APPLICATIONS

For stripping water-based floor polish before applying AllChem Floor Gloss.

Highly
Effective

- USER FRIENDLY
- WATER-BASED
- HIGH STRENGTH FORMULA
- GREAT COST-IN-USE

5 Litre: FK-ACFLS05
