PRODUCT INFORMATION SHEET

BIO TOILET BLOCKS

Product SDS

DEODORISER AND SANITISER

Bio toilet blocks have been designed for use primarily in urinals to clean and deodorise. They introduce microbes which consume odour-causing bacteria. They help to breakdown the build-up of uric salts that constrict the flow of wastewater through pipes.

DIRECTIONS

Suitable for use in washrooms and toilets with offensive odour problems or slow draining/blockage problems. Place one block in each individual urinal, or one every 50cm in trough urinals. Replace when the block has dissolved to maintain ongoing efficiency. Septic tank safe, when used as directed.

Natural
Biological Action

- DEODORISES & SANITISES
- SEPTIC TANK SAFE
- HELPS MINIMISE DRAIN BLOCKAGES
- REDUCES SCALE BUILDUP

4 Kilos: FK-ACTB04
