EVAPORATING HAND SANITISER

WATERLESS ANTI-MICROBIAL SANITISER

An effective, alcohol-based, waterless hand sanitiser that evaporates away within minutes to ensure hands are dry and sanitised. Contains moisturising agents to keep hands conditioned and soft. Suitable for use after hand washing or between washes to maintain hygiene.

DIRECTIONS

This is ready to use product. Dispense 2-5 ml of Evaporating Hand Sanitiser directly onto washed, dried hands. Rub your hands together until dry, ensuring all areas are covered. This should take around 20 seconds. This may be used as a hand sanitising compound in all areas. The compound must be supplied from a fixed, metered dispenser located a sufficient distance from the processing line to prevent product contamination. Before the sanitiser is applied, hands must be clean. This includes washing the hands where necessary. After use, the hands need not be rinsed but must be dry before the operator returns to the processing line.

APPLICATIONS

Alcohol-based evaporating hand sanitiser for high sanitation in commercial or hospitality environments such as food service, retail, resthomes or in high-use washrooms. Suitable for both domestic and commercial applications.

MPI Approved C54 (all animal products except dairy)

- ALCOHOL-BASED
- EVAPORATING FORMULA
- SOFT ON HANDS
- MOISTURISING AGENTS
