NAPPY WASH

ANTIBACTERIAL NAPPY & FABRIC CLEANER

Cleans and sanitises nappies, clothes and other fabrics. Hygienically removes stains and odours, while giving fabric extra brightness. Contains an oxygen bleach which is safe on dye fast coloured material. Always check washing instructions on garments before proceeding. Not suitable for use on woollens or silks. It should not be used with metal items.

DIRECTIONS

As a pre-soak use at a ratio of 1:150 (60gm/2 scoops per 10 litres) with warm to hot water. More for heavily soiled or stained garments. Allow to soak for at least 30mins before washing. Nappies can be soaked in a similar solution then rinsed in water and dried in direct sunlight. With care, performance can be significantly enhanced with the use of hot water (80deg C) providing high temperatures are garment compatible.

APPLICATIONS

Use as a soak/rejuvenating agent or as an addition to the usual laundry cycle to assist and boost the normal clean.

5 kilos makes up to 750 litres of pre-soak solution*

- POWERFUL FORMULA
- REMOVES STAINS
- SANITISES GARMENTS
- SAFE ON DYE FAST COLOURS
