ADHESIVE REMOVER

CITRUS BASED SOLVENT CLEANER

Powerful multi-purpose cleaning agent suitable for the removal of rubber marks, graffiti, tar and other heavy soiling from a variety of surfaces. Leaves a lasting citrus fragrance.

DIRECTIONS

Always spot test to ensure suitability to application. Apply undiluted directly onto the stain/mark/soiling. If using a sprayer for application, always minimise atomised product by adjusting the spray-nozzle. May be applied directly to a clean cloth or paper towel, instead of direct-to-surface application. Leave for 30 seconds to 10 minutes (depending on soiling type and levels), then wipe with clean cloth or paper towel. Repeat if required. Longer contact time may prove beneficial for soiling such as graffiti and chewing gum. Continual checking of delicate substrates is recommended during all cleaning processes.

APPLICATIONS

Multi-purpose cleaner for tough jobs such as graffiti, rubber marks even tar.
